

STREAMING REVOLUTION

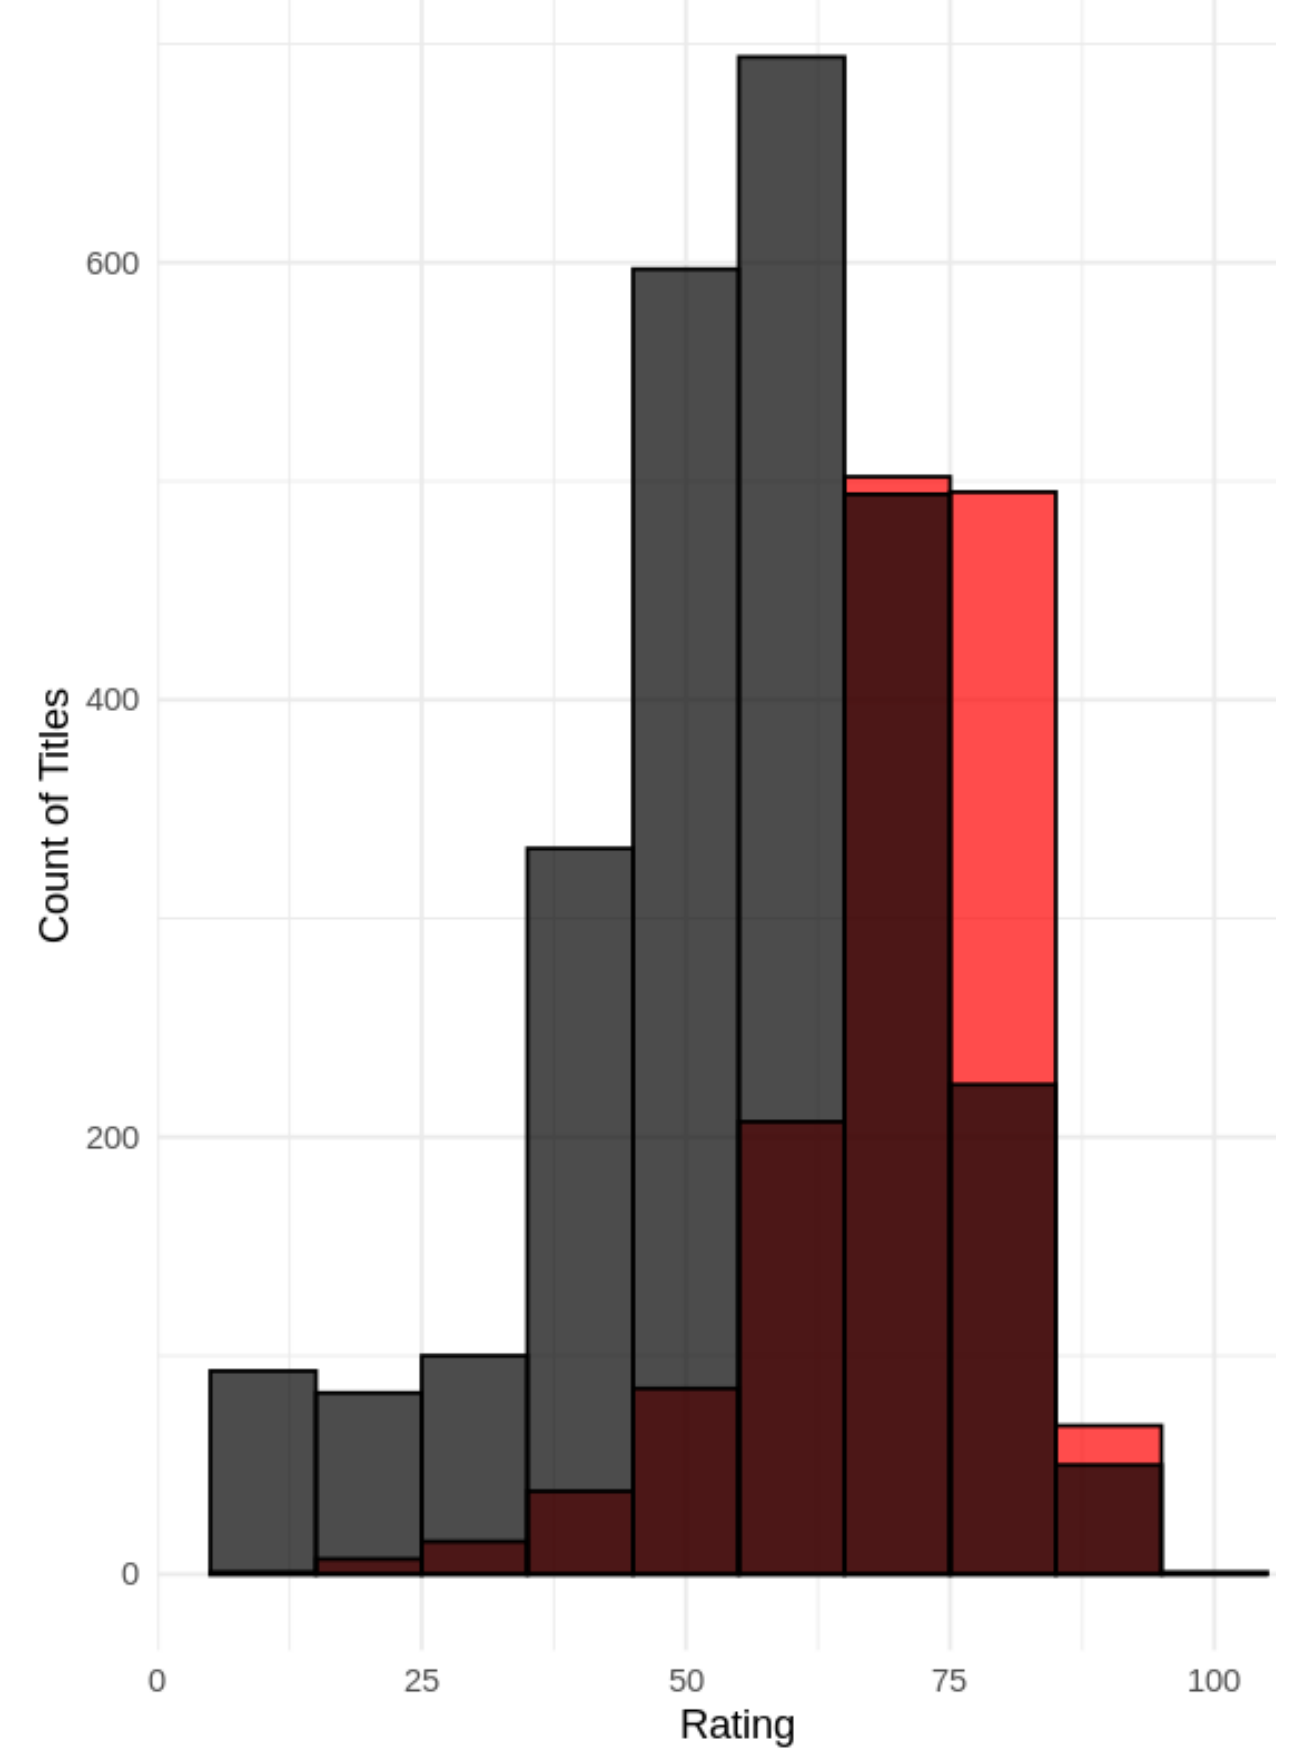

EXPLORE THE REVOLUTION OF DIGITAL ENTERTAINMENT WITH MY DEEP DIVE INTO THE STREAMING INDUSTRY. FROM THE PIONEERING DAYS OF NETFLIX TO THE EXPANSIVE LIBRARIES OF TODAY'S GIANTS, THIS POSTER UNVEILS THE TRENDS, THE GEOGRAPHICAL SPREAD, AND THE RATINGS LANDSCAPE OF ONLINE STREAMING CONTENT

Streaming platforms are like a treasure chest for TV and movie lovers, filled to the brim with shows and films for every mood. Whether you're in the mood to laugh, cry, or sit on the edge of your seat, these services have it all at the click of a button. They connect us with stories from all over the world, making it easy to get a taste of different cultures right from our living rooms. With their personalized suggestions, there's always something new and exciting to watch, making every night a potential movie night.

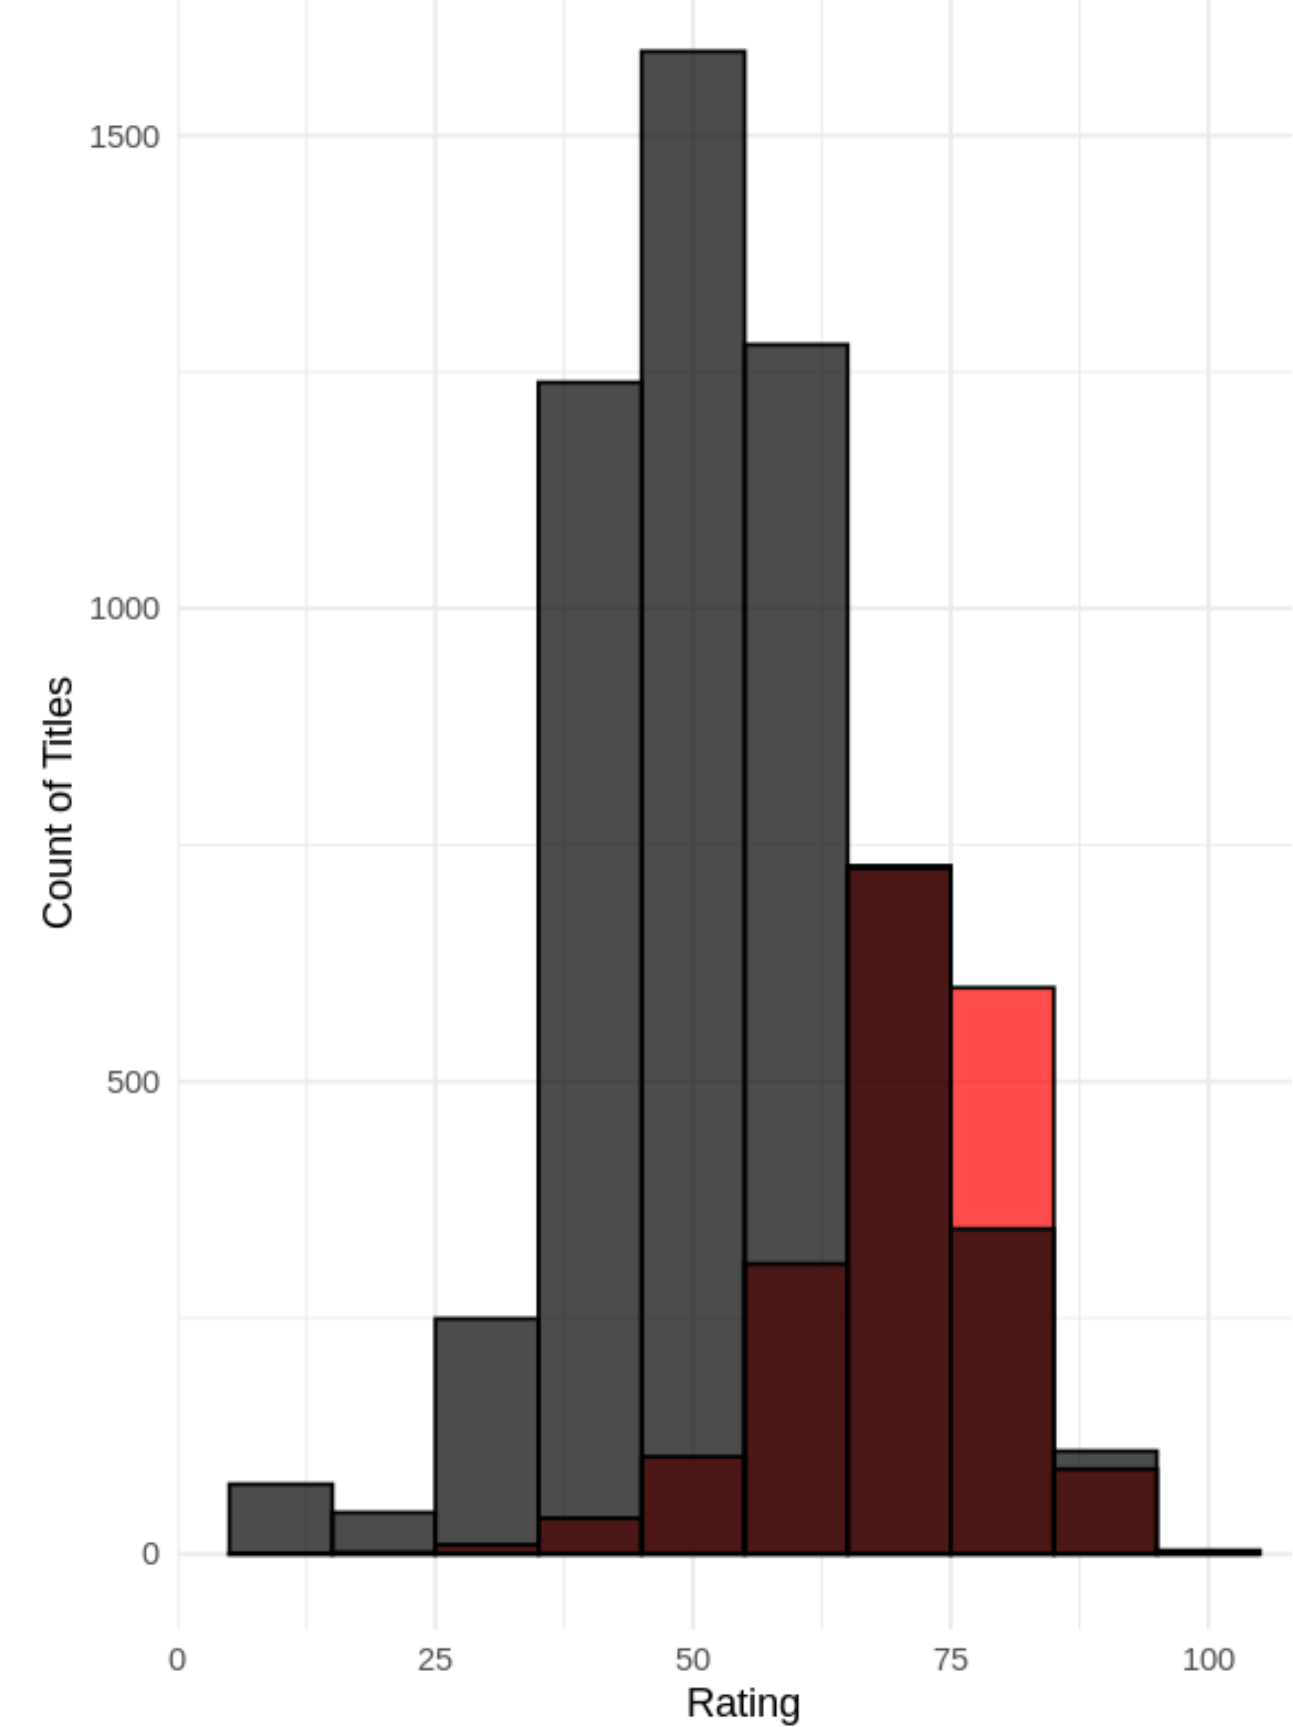

DISNEY +

This visualization just shows that these streaming platforms have a lot of movies and TV shows to offer individually as well as a whole. Netflix and Prime Video seem to be a superior choice here just by the taking a glimpse at the number of titles they provide for on - demand streaming.

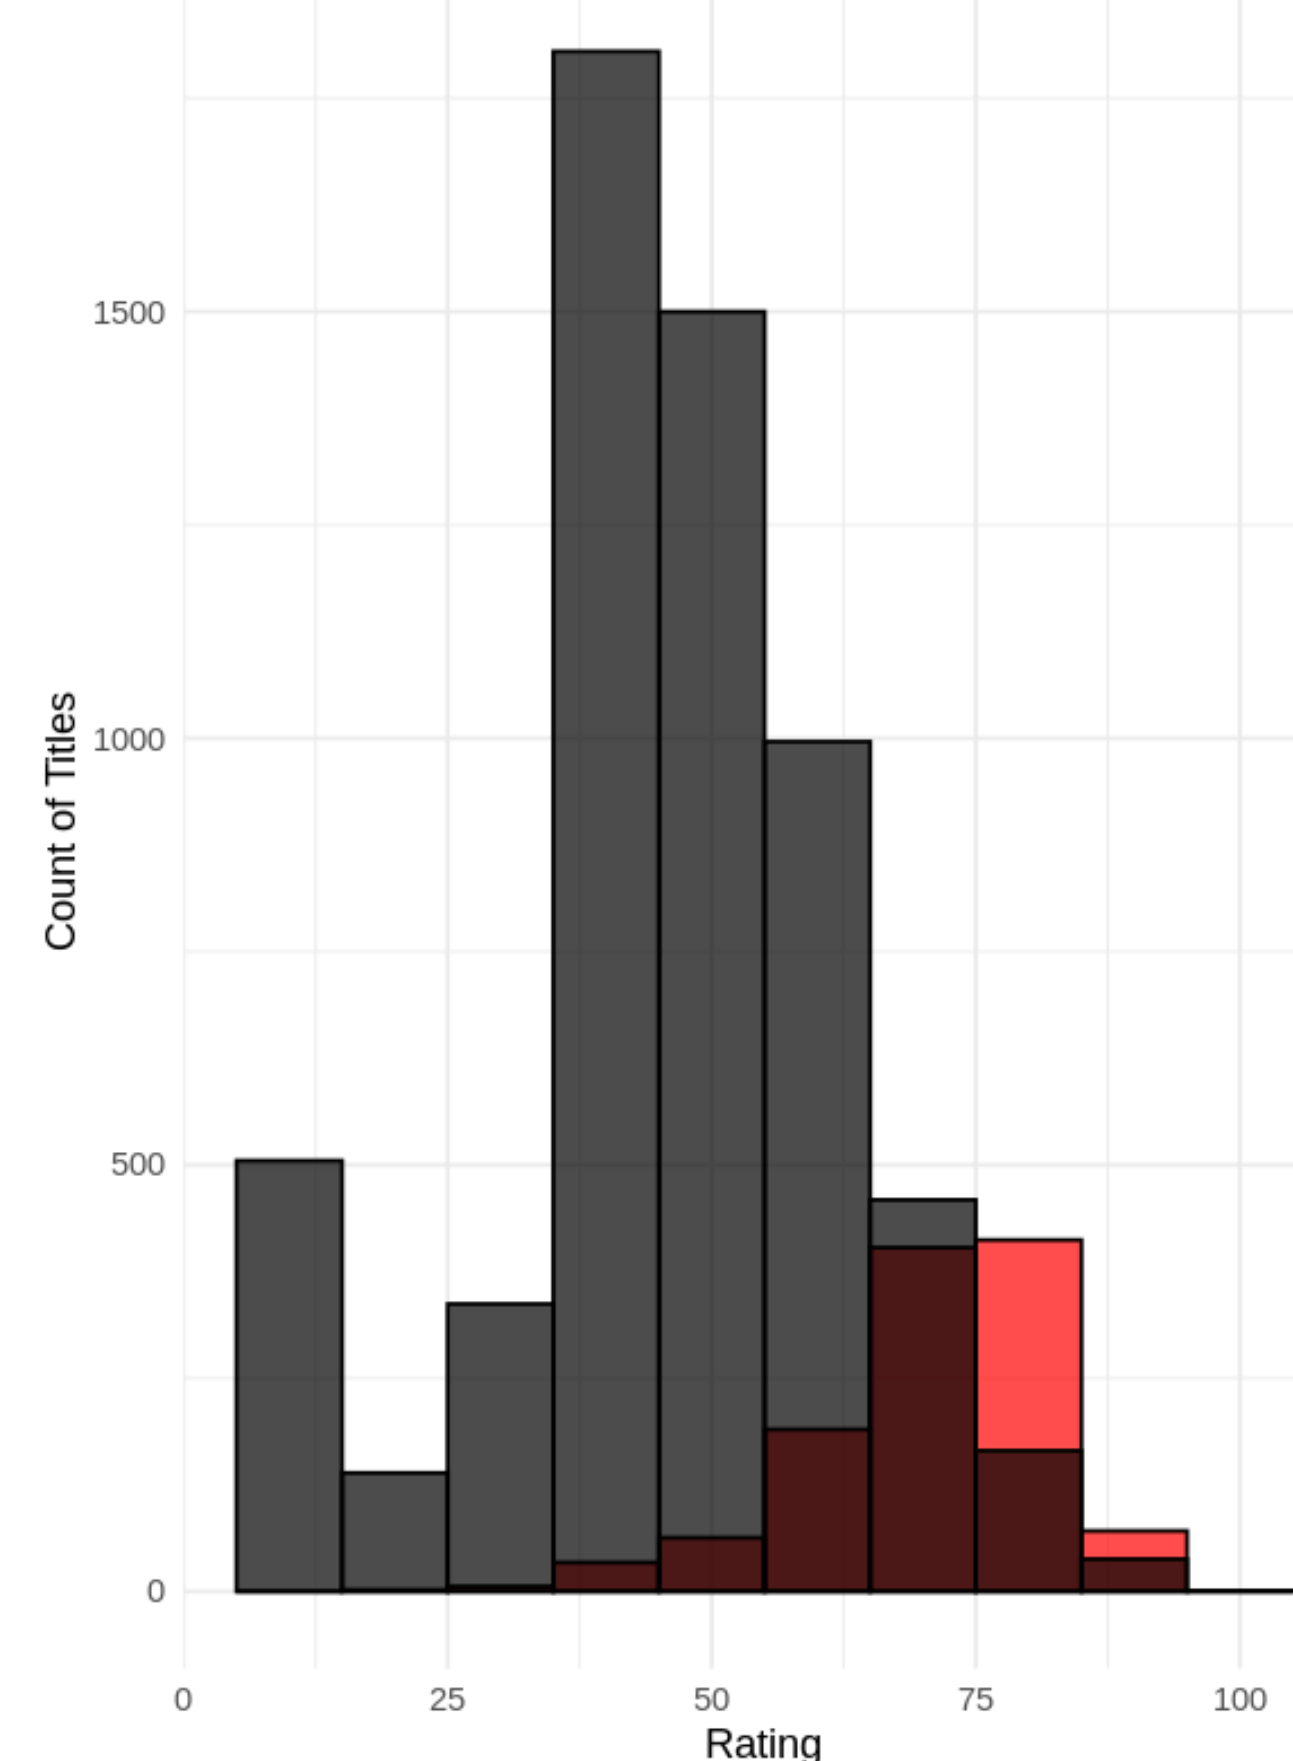

HULU

The visualizations of the amount of these titles on each streaming platform show that these platforms have a wide range of great titles to offer according to the IMDB and Rotten Tomatoes ratings given by the general public who have watched these titles.

AMAZON PRIME

A wide range of titles produced over the past few decades are available to choose from on these video on - demand streaming platforms.

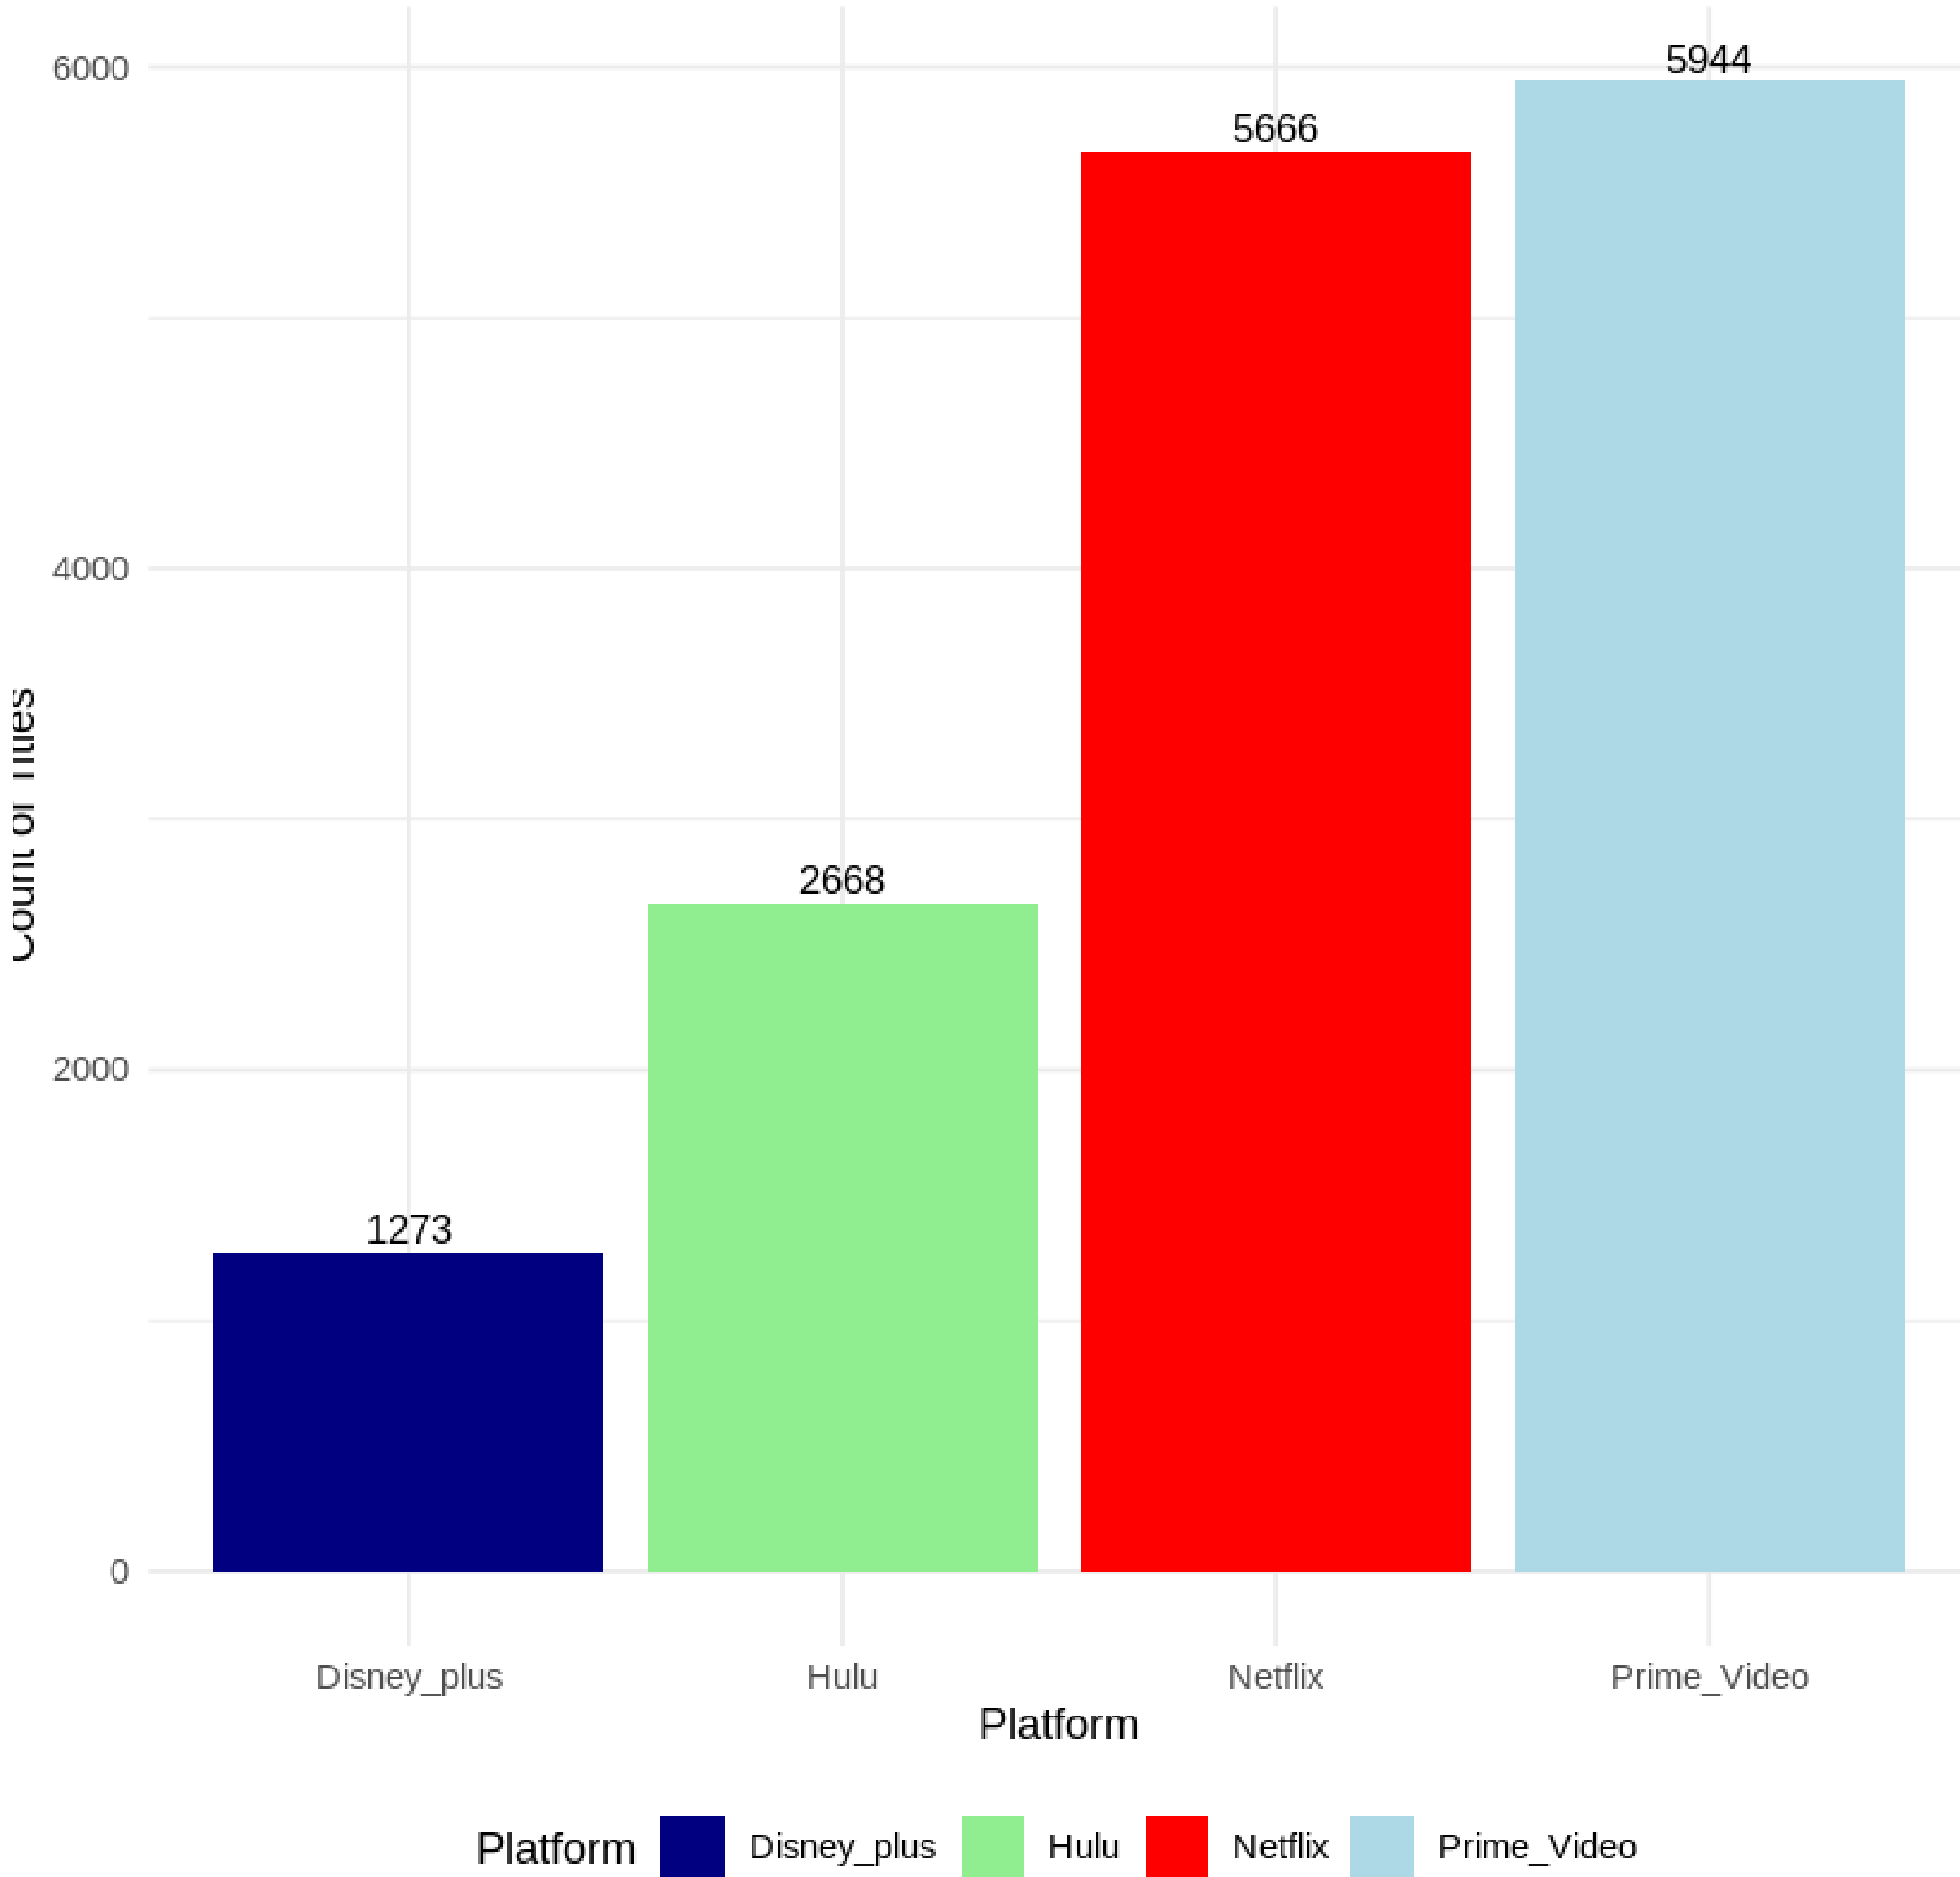

NETFLIX

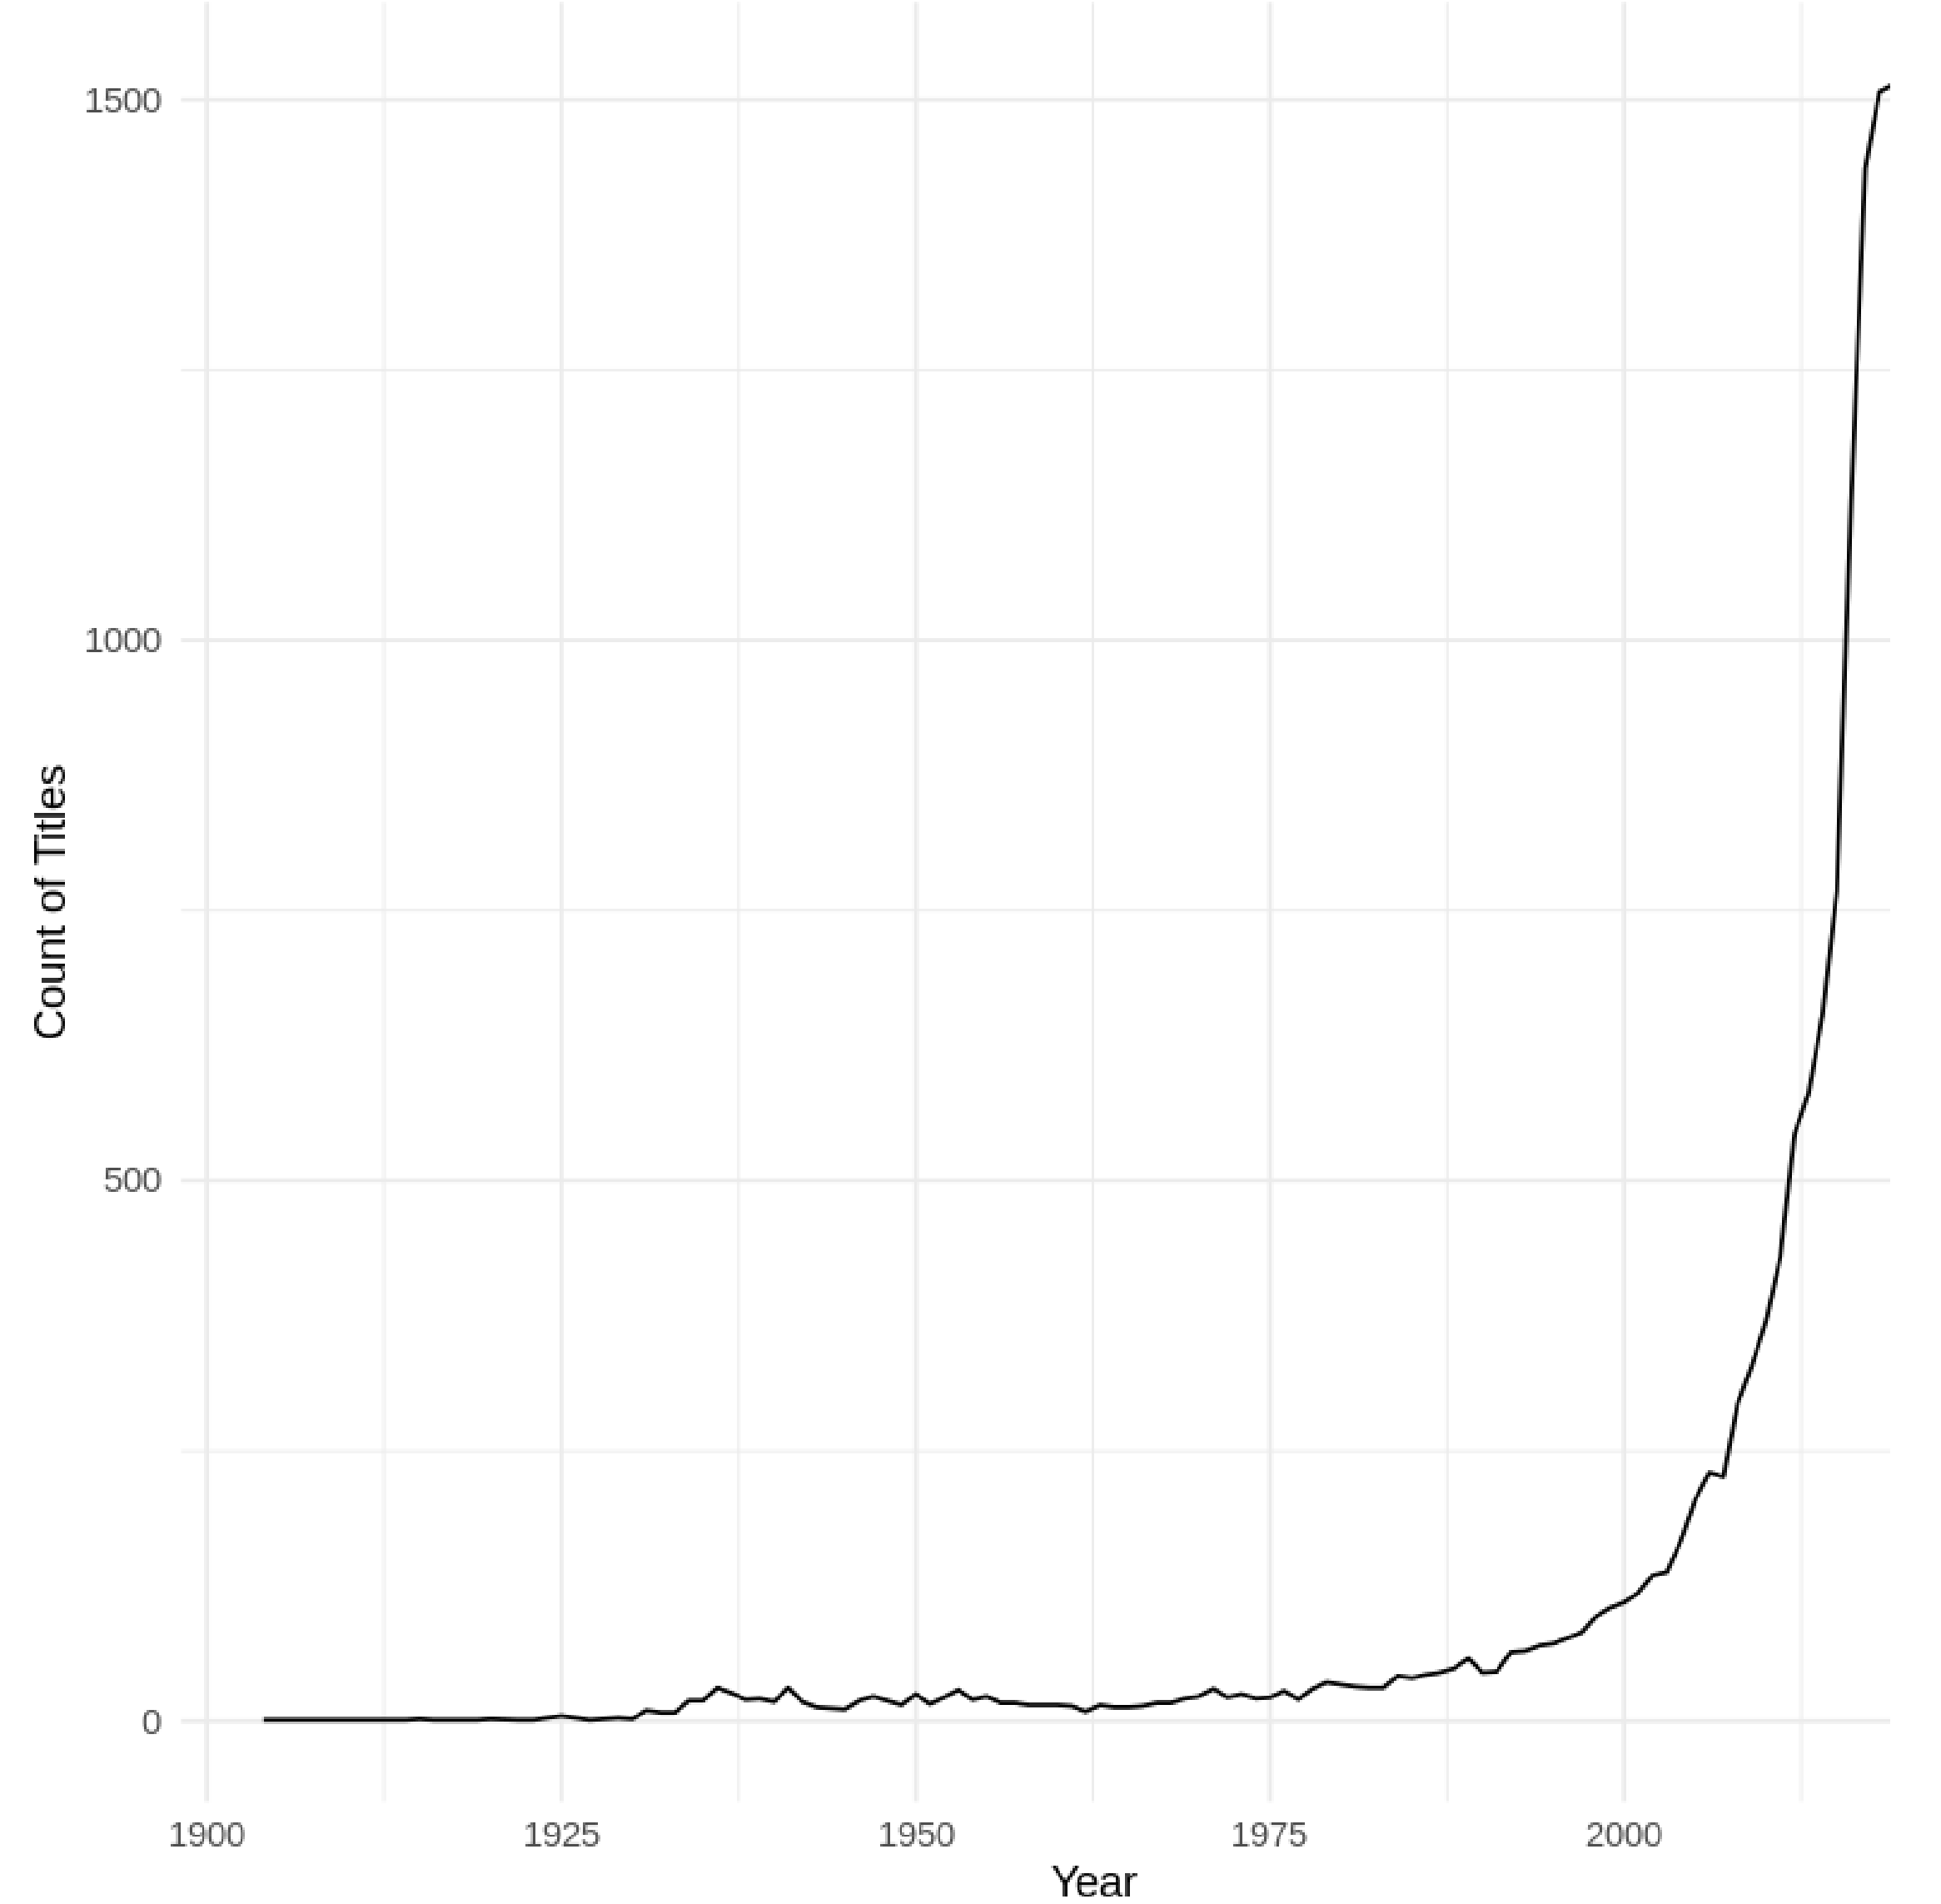

This map shows that a number of these countries are responsible for the production and release of these titles.

India amongst these countries has the most amount of titles produced and released on these streaming platforms.

Count of Titles by Platform

Amount of Titles Per Year
